Objective

Seeking a position as an Ruby on Rails developer. Aiming to become an expert in Ruby and web development.

Summary

I am a 25 years old, Ruby on Rails developer from Macedonia. I have been working with Ruby, Ruby on Rails and JavaScript for about two years. I am fascinated by Git as a version control system, also finding interest in learning Erlang and Elixir. I like sports, especially Basketball, and video games like DotA and Warcraft.

Experience

Full Stack Developer, Medialab.io
Skopje, Macedonia— February 2015 - Present

Member of full stack team of developers working with Ruby as a backend programming language, PostgreSQL for a relational database system and BackboneJS as a frontend Javascript framework.

Projects

OTT Presenter for MaxTV Go, https://maxtvgo.mk

Role: Back-End Developer
Technologies: Ruby

Service for SSO authorization and connecting T-Home Macedonia SOAP API services with the MaxTV Go REST API.

Loop, https://loop.mk/

Role: Full-Stack Developer
Technologies: Ruby on Rails backend with Grape, BackboneJS frontend using Zurb Foundation as CSS framework.

A cloud based, social network for T-Home users in Macedonia, with payed storage space, with ability to save and share content among friends, and then later watch it on web, mobile or setupbox (TV). It serves around 20k active users.

Showroom

Role: Full-Stack Developer

Technologies: Ruby on Rails backend, BackboneJS frontend using Bootstrap as CSS framework, Wowza stream engine.

Built for T-Home's Intranet in Macedonia. A multimedia platform that allows users to seamlessly switch between different types of media; and directly present them in full screen to a number of devices.

Data Retention, NDA

Role: Full-Stack Developer
Technologies: Ruby on Rails backend, BackboneJS frontend using Bootstrap as CSS framework.

Platform for searching data based on police and court orders.

Mobico, http://www.mobico.com.mk/

Role: Full-Stack Developer
Technologies: Ruby on Rails app with Bootstrap as CSS framework

E-commerce application for Mobico company. The development of the app is finalized, it is expected by the client to release the application to the public.

Pepsi

Role: Back-End Developer
Technologies: Ruby on Rails app

A lottery game that lasted for 3 months for the Pepsi company in Macedonia. It served over 100k people, where we had to work with third party API in order to accept SMS from users.

Balneum, http://brfbalneum.se/

Role: Front-End Developer
Technologies: HTML and CSS

Developed selected pages on the application and provided system-wide maintenance.

Internship, Siyelo
Skopje, Macedonia— July 2014 - February 2015

Worked on different projects, even live ones. Here I've first encountered working remotely as a team, and practices like TDD, agile, kanban, scrum.

Projects
- Created a Twitter clone with Ruby on Rails framework
- Creating a Producthunt.com clone with Ruby on Rails framework
- Worked on StaticMatic static-pages project thelvb.com
- Worked on Spree e-commerce project espresseco.com

Education
